

## Index for Volume 46 (1975)

This index is composed of the following three subindexes: (1) bibliographical, (2) author, and (3) topic. Entries in the bibliographical index are numbered and have been alphabetized by the last name of the author or, in the case of multiple authors, by the last name of the senior author. Reference information includes the name(s) of the author(s), the title of the article, the month of publication, and the page on which it is found.

The author index cites the name of each author, followed by the month of publication and page(s) on which the article(s) begin.

In the topic index, each article is listed under those important topics about which the article provides information and/or data. The number or numbers included in the listing refer to the initial page of the article in which the topic is discussed.

### *I. Bibliographical Index*

1. ASHTON, T. EDWIN J., and SINGH, MOHAN. Relationship between erectors spinae voltage and back-lift strength for isometric, concentric, and eccentric contractions. Oct. 282.
2. AUSTIN, DEAN A. Effect of distributed and massed practice upon the learning of a velocity task. March 23.
3. BALAZS, EVA K. Psycho-social study of outstanding female athletes. Oct. 267.
4. BIRD, ANNE MARIE. Cross sex effects of subject and audience during motor performance. Oct. 379.
5. BROWN, ELIZABETH YECKEL, and SHAW, CARL N. Effects of a stressor on a specific motor task on individuals displaying selected personality factors. March 71.
6. BROWN, SHEILA. Personality characteristics of selected groups of women educators. May 127.
7. BUCCOLA, VICTOR A., and STONE, WILLIAM J. Effects of jogging and cycling programs on physiological and personality variables in aged men. May 134.
8. BURKE, EDMUND J., and FRANKS, B. DON. Changes in  $VO_{2\max}$  resulting from bicycle training at different intensities holding total mechanical work constant. March 31.
9. CASHER, BONNIE BERGER, and STADULIS, ROBERT E. Arm-positioning accuracy as a function of direction, extent, and presentation. Oct. 312.
10. CHANDLER, JOE V.; LANGLEY, THOMAS D., and BLAIR, STEVEN N. Movement times for jab and cross-over steps by high school football players. May 147.
11. COCHRAN, BARBARA J. Effect of physical fatigue on learning to perform a novel motor task. May 243.
12. CORSER, TOM. A simple surface electrode specially suited for electromyographic studies of vigorous movements. May 140.
13. COOPER, KENNETH H.; PURDY, J. GERRY; FRIEDMAN, ART; BOHANNON, RICHARD L.; HARRIS, RUSSELL A.; and ARENDS, JOSEPH A. An aerobics conditioning program for the Fort Worth, Texas school district. Oct. 345.
14. CRAMER, JOHN L. Comparative analysis of unaided emmetropic and unaided noncorrected myopic underwater visual acuity. March 100.
15. CROUSSORE, MICHAEL S., and GRUBER, JOSEPH J. Development of a device to measure the degree of visual distortion encountered in underwater diving. Dec. 428.

16. CURETON, KIRK J.; BOILEAU, RICHARD A.; and LOHMAN, TIMOTHY G. Relationship between body composition measures and AAHPER test performances in young boys. May 218.
17. DANIELSON, R. R.; ZELHART, JR., P. F.; and DRAKE, C. J. Multidimensional scaling and factor analysis of teaching behavior as perceived by high school hockey players. Oct. 323.
18. DEUTSCH, HELGA; MARINO, C. WAYNE; and ANDRES, TERRANCE. Consistency of submaximal integrated electromyographic tracings. Dec. 410.
19. DISCH, JAMES; FRANKIEWICZ, RONALD; and JACKSON, ANDREW. Construct validation of distance run tests. May 169.
20. DOBBINS, D. ALAN, and RARICK, C. LAWRENCE. Structural similarity of the motor domain of normal and educable retarded boys. Dec. 447.
21. ECKERT, HELEN M. Factorial analyses of perceptual motor and reading skills. March 85.
22. ELLISON, KERRY, and FREISCHLAG, JERRY. Pain tolerance, arousal, and personality relationships of athletes and nonathletes. May 250.
23. FOSTER, CARL. Physiological requirements of aerobic dancing. March 120.
24. FRATZKE, MEL R. Personality and biographical traits of superior and average college basketball officials. Dec. 484.
25. FULTON, CLIFFORD D., and HUBBARD, ALFRED W. Effect of puberty on reaction and movement time. Oct. 335.
26. GEORGE, COLLEEN, and JACKSON, ANDREW S. Influence of tonic neck posture upon grip strength of institutionalized mental retardates. March 17.
27. HEYWARD, VIVIAN H. Influence of static strength and intramuscular endurance on submaximal static muscle endurance. Dec. 393.
28. HEYWARD, VIVIAN; McKEOWN, BARRY; and GEESEMAN, RALPH. Comparison of the Stoelting hand grip dynamometer and linear voltage differential transformer for measuring maximal grip strength. May 262.
29. HOLLINGSWORTH, BARBARA. Effects of performance goals and anxiety on learning a gross motor task. May 162.
30. HUMPHREY, L. DENNIS, and FALLS, HAROLD B. Circulatory and metabolic responses of young women at HR = 180 and HR = max. Dec. 498.
31. JACKSON, ANDREW S., and FRANKIEWICZ, RONALD J. Factorial expressions of muscular strength. May 206.
32. JANTZ, RICHARD K. Moral thinking in male elementary pupils as reflected by perception of basketball rules. Dec. 414.
33. JENSEN, BARBARA E. Pretask speed training and movement complexity as factors in rotary pursuit skill acquisition. March 1.
34. KATCH, VICTOR L., and PARK, MELVIN W. Minute-by-minute oxygen requirement and work efficiency for constant load exercise of increasing duration. March 38.
35. KIDD, THOMAS R., and WOODMAN, WILLIAM F. Sex and orientation toward winning in sport. Dec. 476.
36. KNOWLTON, RONALD G., and DEUTSCH, DAVID T. Performance outcomes of cross-country running structured in a voluntary activity class. Oct. 371.
37. KRAHENBUHL, GARY S.; PLUMMER, RAMONA F.; GAINTER, GERALD L. Motor and sensory set effects of grab-start times of champion female swimmers. Dec. 441.
38. McKINNEY, DONALD; McKINNEY, PATRICIA; OVERMAN, STEVEN; and STRINGFELLOW, MARVIN. Investigation of a training shoe as a supplemental conditioning device. Dec. 422.
39. MACMILLAN, M. B. Determinants of the flight of the kicked football. March 48.
40. MAYHEW, J. L., and GIFFORD, P. B. Prediction of maximal oxygen intake in preadolescent boys from antropometric parameters. Oct. 302.
41. MERRIMAN, JANICE SANNER. Stroboscopic photography as a research instrument. May 256.
42. NEWELL, K. M. Visual flight feedback as a determiner of motor response recognition. May 235.

43. NYGAARD, GARY. Interaction analysis of physical education classes. Oct. 351.
44. PERETTI, PETER O. Perceived personality impressions of student acceptance and rejection interaction patterns in the classroom. Dec. 457.
45. PERRY, JEAN L. Counselor preferences of female high school students in the state of Illinois. May 184.
46. ROBERTS, GLYN C. Sex and achievement motivation effects on risk taking. March 58.
47. ROSENTSWIEG, JOEL; HINSON, MARILYN; and RIDGWAY, MARY. An electromyographic comparison of the isokinetic bench press performed at three speeds. Dec. 471.
48. SCHEER, JOHN K., and ANSORGE, CHARLES J. Effects of naturally induced judges' expectations on the ratings of physical performance. Dec. 463.
49. SHICK, JACQUELINE. Effect of target color on throwing accuracy. Oct. 389.
50. SNYDER, ELTON E., and KIVLIN, JOSEPH E. Women athletes and aspects of psychological well-being and body image. May 191.
51. STAMM, CAROL L., and SAFRIT, MARGARET J. Comparison of significance test for repeated measures ANOVA design. Dec. 403.
52. STEVENSON, CHRISTOPHER L. Socialization effects of participation in sport: A critical review of the research. Oct. 287.
53. STRAUB, WILLIAM F. Validation of a ski simulator. March 92.
54. STUBBS, NANCY B.; CAPEN, EDWARD K.; and WILSON, GARY L. An electromyographic investigation of the sartorius and tensor fascia latae muscles. Oct. 358.
55. THOMAS, JERRY R.; CHISSOM, BARD S.; STEWART, CHARLENE; and SHELLEY, FRANCIS. Effects of perceptual motor training on preschool children: a multivariate approach. Dec. 505.
56. VAN DALEN, D. B. Body image and the Presidency: Abraham Lincoln. Dec. 489.
57. VAN OTEGHEN, SHARON L. Two speeds of isokinetic exercise as related to the vertical jump performance of women. March 78.
58. VAN GHELUWE, Bart. Errors caused by misalignment of the cameras in cinematographical analyses. May 153.
59. VODAK, PAUL A., and WILMORE, JACK H. Validity of the 6-minute jog-walk and the 600-yard run-walk in estimating endurance capacity in boys, 9-12 years of age. May 230.
60. WALLACE, JANET P. Responses of the composition of body fat to cardiovascular training in college women. Oct. 317.
61. WEICK, KATHRYN. Objectives of physical education expressed as needs by university students. Oct. 385.
62. WHITLEY, JIM D. Effects of maximizing inertial resistance on performing and learning a motor task. March 110.
63. WINDELL, EDITH JANE, and KINDIG, LOUISE E. A sequential timing device. Oct. 391.
64. WIDDOP, JAMES H., and WIDDOP, VALERIE A. Comparison of the personality traits of female teacher education and physical education students. Oct. 274.
65. WILLIAMS, JEAN M., and THIRER, JOEL. Vertical and horizontal peripheral vision in male and female athletes and nonathletes. May 200.
66. WILLIAMS, L. R. T. Effects of complexity on movement refractoriness. May 177.
67. WILLIAMS, LOIS. Reliability of predicting maximal oxygen intake using the Astrand-Ryhmung nomogram. March 12.
68. ZAICKOWSKY, LEONARD D. Method for analyzing serial perceptual motor responses. Dec. 514.
69. ZAICKOWSKY, LINDA B. Attitudinal differences in two types of physical education programs. Oct. 364.

II. *Author Index*

After the name of each author is the month of publication and the page(s) on which the article(s) begin.

- Andres, Terrance, Dec. 410.  
Ansorge, Charles J., Dec. 463.  
Arends, Joseph A., Oct. 345.  
Ashton, T. Edwin J., Oct. 282.  
Austin, Dean A., Mar. 23.  
  
Balazs, Eva K., Oct. 267.  
Bird, Anne Marie, Oct. 379.  
Blair, Steven N., May 147.  
Bohannon, Richard L., Oct. 345.  
Boileau, Richard A., May 218.  
Brown, Elizabeth Yeckel, Mar. 71.  
Brown, Sheila, May 127.  
Buccola, Victor A., May 134.  
Burke, Edmund J., Mar. 31.  
  
Capen, Edward K., Oct. 358.  
Casher, Bonnie Berger, Oct. 312.  
Chandler, Joe V., May 147.  
Chissom, Brad S., Dec. 505.  
Cochran, Barbara J., May 243.  
Cooper, Kenneth H., Oct. 345.  
Corser, Tom, May 140.  
Cramer, John L., Mar. 100.  
Croussore, Michael S., Dec. 428.  
Cureton, Kirk J., May 218.  
  
Danielson, R. R., Oct. 323.  
Deutsch, David T., Oct. 371.  
Deutsch, Helga, Dec. 410.  
Disch, James, May 169.  
Dobbins, D. Alan, Dec. 447.  
Drake, C. J., Oct. 323.  
  
Eckert, Helen M., Mar. 85.  
Ellison, Kerry, May 250.  
  
Falls, Harold B., Dec. 498.  
Foster, Carl, Mar. 120.  
Frankiewicz, Ronald, May 169.  
  
Frankiewicz, Ronald J., May 206.  
Franks, B. Don, Mar. 31.  
Fratzke, Mel R., Dec. 484.  
Freischlag, Jerry, May 250.  
Friedman, Art, Oct. 345.  
Fulton, Clifford D., Oct. 335.  
  
Gaintner, Gerald L., Dec. 441.  
Geeseman, Ralph, May 262.  
George, Colleen, Mar. 17.  
Gifford, P. B., Oct. 302.  
Gruber, Joseph J., Dec. 428.  
  
Harris, Russell A., Oct. 345.  
Heyward, Vivian, May 262.  
Heyward, Vivian H., Dec. 393.  
Hinson, Marilyn, Dec. 471.  
Hollingsworth, Barbara, May 162.  
Hubbard, Alfred W., Oct. 335.  
Humphrey, L. Dennis, Dec. 498.  
  
Jackson, Andrew S., Mar. 17.  
Jackson, Andrew, May 169.  
Jackson, Andrew S., May 206.  
Jantz, Richard K., Dec. 414.  
Jensen, Barbara E., Mar. 1.  
  
Katch, Victor L., Mar. 38.  
Kidd, Thomas R., Dec. 476.  
Kindig, Louise E., Oct. 391.  
Kivlin, Joseph E., May 191.  
Knowlton, Ronald G., Oct. 371.  
Krahenbuhl, Gary S., Dec. 441.  
  
Langley, Thomas D., May 147.  
Lohman, Timothy C., May 218.  
  
McKeown, Barry, May 262.  
McKinney, Donald, Dec. 422.  
McKinney, Patricia, Dec. 422.

- Macmillan, M. B., Mar. 48.  
Marino, C. Wayne, Dec. 410.  
Mayhew, J. L., Oct. 302.  
Merriman, Janice Sanner, May 256.  
Newell, K. M., May 235.  
Nygaard, Gary, Oct. 351.  
Overman, Steven, Dec. 422.  
Park, Melvin W., Mar. 38.  
Peretti, Peter O., Dec. 457.  
Perry, Jean L., May 184.  
Plummer, Ramona F., Dec. 441.  
Purdy, J. Gerry, Oct. 345.  
Rarick, C. Lawrence, Dec. 447.  
Ridgway, Mary, Dec. 471.  
Roberts, Glyn C., Mar. 58.  
Rosentswieg, Joel, Dec. 471.  
Safrit, Margaret J., Dec. 403.  
Scheer, John K., Dec. 463.  
Shaw, Carl N., Mar. 71.  
Shelley, Francis, Dec. 505.  
Shick, Jacqueline, Oct. 389.  
Singh, Mohan, Oct. 282.  
Snyder, Eldon E., May 191.  
Stadulis, Robert E., Oct. 312.  
Stamm, Carol L., Dec. 403.  
Stevenson, Christopher L., Oct. 287.  
Stewart, Charlene, Dec. 505.  
Stone, William J., May 134.  
Straub, William F., Mar. 92.  
Stringfellow, Marvin, Dec. 422.  
Stubbs, Nancy B., Oct. 358.  
Thirer, Joel, May 200.  
Thomas, Jerry R., Dec. 505.  
Van Dalen, D. B., Dec. 489.  
Van Gheluwe, Bart, May 153.  
Van Oteghen, Sharon L., Mar. 78.  
Vodak, Paul A., May 230.  
Wallace, Janet P., Oct. 317.  
Weick, Kathryn, Oct. 385.  
Whitley, Jim D., Mar. 110.  
Widdop, James H., Oct. 274.  
Widdop, Valerie A., Oct. 274.  
Williams, Jean M., May 200.  
Williams, L. R. T., May 177.  
Williams, Lois, Mar. 12.  
Wilmore, Jack H., May 230.  
Wilson, Gary L., Oct. 358.  
Windell, Edith Jane, Oct. 391.  
Woodman, William F., Dec. 476.  
Zelhart, Jr., P. F., Oct. 323.  
Zaichkowsky, Leonard D., Dec. 514.  
Zaichkowsky, Linda B., Oct. 364.

## III. Topic Index

*Each topic is followed by the initial page number(s) of the article(s) in which the topic is discussed.*

**A**

- AAHPER Youth Fitness Test performance in young boys; 218
- achievement motivation, effects on risk taking; 58
- aerobics conditioning program, Fort Worth, Texas school district; 345
- aerobic dancing,
  - cardiorespiratory fitness; 120
  - maximal oxygen consumption; 120
  - physiological requirements; 120
- aerobic working capacity, index of physical fitness; 169
- age, predictor of maximal oxygen uptake; 12
- aged men, effects of jogging and cycling; 134
- angle of launch, Australian football; 48
- anthropometric parameters, used to predict maximal oxygen intake; 302
- anxiety, influence on learning a gross motor task; 162
- arm-positioning accuracy, related to direction, extent, and presentation; 312
- arousal, relationships of athletes and nonathletes; 250
- Astrand-Ryhming nomogram, predictor of maximal oxygen intake; 12
- athletes, pain tolerance and arousal; 250
- Australian Rules football; 48
- Astrand bike test; 134

**B**

- back-lift strength, relationship of erectors spinae voltage to; 282
- Balke treadmill test, measure of cardiorespiratory fitness; 498
- basketball officials, college level, personality traits; 484
- basketball rules, related to moral thinking; 414
- bench press, isokinetic exercise; 471
- Bernreuter Personality Inventory; 250
- bicycle ergometer; 31
  - used to evaluate lean muscle mass and central circulatory potential; 302
  - used to record resting heart rate; 12
- fatigor in novel motor task learning experiment; 243
- recording resting heart rate; 31
- bicycle training, changes in  $\dot{V}O_2$  max; 31

- body composition measures; 218
- body image and the Presidency; 489
- body image and psychological well-being of women athletes; 191
- Box's approximate test; 403

**C**

- camera misalignment, as cause of error in cinematographical analyses; 153
- cardiorespiratory fitness, aerobic dancing; 120
- cardiovascular endurance training, influenced by running program; 345
- cardiovascular training, defined as walking and running; 317
- cardiovascular training in college women, responses of body fat; 317
- catch skills for boys; 85
- Cattell's 16 PF, assessment of physical education students; 274
- Cattell's 16 PF (Form A), testing college basketball officials; 484
- Cattell's 16 Personality Factor Inventory; 71, 127, 134
- Central Association of Physical Education for College Women; 127
- cinematographical techniques used to analyze human movement; 157
- cinematography, high speed; 48
- circulatory responses, young college women; 498
- coaching behavior, perceived by high school hockey players; 323
- composition of body fat in college women; 317
- computer reduction of data; 48
- conditioning device, training shoe; 422
- contractions, isometric, concentric, and eccentric; 282
- Cooper 12-min run-walk test; 345
- counselor preferences among female high school students; 184
- constant load exercise of increasing duration; 38
- cross country running as a voluntary activity class; 371
- cycling, effects on aged men; 134

**D**

- distance run tests, construct validation of; 169
- distributed practice; 23

diving, underwater, influence of visual distortion; 428

## E

educable retarded boys; 447  
 Edwards Personal Preference Schedule (EPPS); 267  
 electrical measurement of muscle activity; 410  
 electromyographic analysis of bench press exercise; 471  
 electromyographic investigation of leg muscles; 358  
 electromyographic studies of vigorous movements; 140  
 electromyographic tracings, measure of muscle activity; 410  
 electrode for electromyographic study; 140  
 emmetropic underwater visual acuity; 100  
 emotional stability (C), (Cattell 16 PF), related to ability to withstand stress; 71  
 endurance capacity in boys, 9-12; 230  
 eye-hand coordination; 85

## F

factorial analyses of  
   perceptual motor and reading skills; 85  
 factorial expression of muscular strength; 206  
 fat, composition in college women; 317  
 fatigue state of learner, a favorable influence on performing and learning novel motor skills; 243  
 female, circulatory and metabolic responses; 498  
 female athletes, psycho-social study; 267  
 female athletes, vertical and horizontal peripheral vision; 200  
 female conservatism, cultural stereotype supported; 58  
 female high school students, counselor preferences; 184  
 femininity and competition, conflict for female athlete; 267  
 Flanders System of Interaction Analysis; 351  
 flight feedback withdrawal impairs response recognition; 235  
 flight of kicked football; 48  
 football, flight of; 48  
 football players, jab and cross-over steps; 147  
 frequency of practice session, skill learning; 23

frequency of trails, estimated oxygen uptake; 12

## G

Galvanic Skin Response (GSR), measure of arousal; 250  
 Gates Primary Reading test; 85  
 Geisser-Greenhouse conservative test; 423  
 grab-start times, female swimmers; 441  
 grip strength of institutionalized mental retardates; 17  
 gross motor task, effects of performance goals and anxiety on learning; 162  
 group structure of sixth grade classes; 459  
 gymnastic coaches, ratings of students; 463

## H

heart rate at 180 and at max, young college women; 498  
 heart rate, predictor of maximal oxygen uptake; 12  
 Henry, F. M., memory drum theory of neuromotor reaction; 177  
 heterosexuality, related to athletic achievement; 267  
 high school football players, jab and cross-over steps; 147  
 high speed cinematography; 48  
 hockey players, perception of coaching behavior; 323  
 horizontal peripheral vision, in male and female athletes; 200

## I

inertial resistance, maximized, effects on performing and learning a motor task; 110  
 intramuscular occlusion, related to static strength; 393  
 interstimulus intervals (isis), movement refractoriness should increase with delay between the two signals; 177  
 isokinetic exercise; 78  
   electromyographic measurement; 471

## J

jab and cross-over steps used by high school football players; 147  
 jogging, effects on aged men; 134  
 jog-walk, 6-min test; 230  
 judges expectations, influence on ratings of physical performance; 463

**K**

- <sup>40</sup>K counting, measurement of total body potassium; 218
- Kenyon Attitude Toward Physical Activity Inventory; 364
- kindergarten children, perceptual-motor training; 505
- kinesiological studies, electromyographic studies; 140
- knowledge of results (KR) learning trials; 235
- Kruskal-Shepard multidimensional scaling; 323

**L**

- Landolt broken circle target test; 100
- leadership required in athletic competition, discrete; 127
- leg strength, unrelated to performance and learning; 110
- LEGG shoe, conditioning device; 422
- length of practice sessions, skill learning; 23
- Lincoln, Abraham, body image; 489
- linear learning trend; 23
- linear voltage differential transformer, measuring maximal grip strength; 262
- Lynn Achievement Motivation Questionnaire (LAMQ); 58

**M**

- male athletes, vertical and horizontal peripheral vision; 200
- massed practice (MP); 23, 110
- maximal grip strength, measured by Stoelting hand grip dynamometer; 262
- measured by linear voltage differential transformer; 262
- maximal oxygen consumption, aerobic dancing; 120
- maximal oxygen intake; 12
- maximal oxygen intake in preadolescent boys, prediction of; 302
- max  $\dot{V}O_2$ , joggers; 134
- maximal voluntary contractile strength; 393
- measuring instruments, athletes motor performance, ski simulator; 92
- mechanical work, influenced by bicycle training at different intensities; 31
- memory drum predictions re movement refractoriness; 177
- memory drum theory, basis of neuromotor reaction; 441

- metabolic responses, young college women; 498
- misalignment of cameras; cinematographical analyses; 153
- moment of inertia (I), artificially increased; 110
- moral thinking, related to basketball rules; 414
- motor domain of retarded boys; 447
- motor performance, sex effects of subject and audience; 379
- motor response recognition, determined by visual flight feedback; 235
- motor set effects on grab-start times among female swimmers; 441
- motor task performance, influenced by emotional stability; 71
- motor task performance, influenced by self-confidence; 71
- movement complexity; 1
- movement orientation; 206
- movement refractoriness, effects of complexity on; 177
- movement time, influenced by puberty; 335
- movement times, jab and cross-over steps, football players; 147
- muscle action potential (MAP); 471
- muscle endurance, influence of static strength; 393
- muscular endurance task, determinant of pain tolerance; 250
- muscular strength, factorial expression of; 206
- myopic underwater visual acuity; 100

**N**

- negative stereotypes regarding women athletes; 191
- Neuman-Keuls test, to measure muscle shortening; 282
- nonathletes, pain tolerance and arousal; 250
- nonathletes, vertical and horizontal peripheral vision; 200
- non steady-state work; 38
- novel motor task, effects of physical fatigue on learning; 243

**O**

- Olympic female athletes, champion level; 267
- orientation toward winning in sport, related to sex; 476
- oxygen requirement; 38
- oxygen uptake lag (deficit),  $O_2$  debt; 38

**P**

- pain tolerance, relationships of athletes and nonathletes; 250
- perceptual motor skills, factorial analyses of; 85
- perceptual motor responses, serial responses, defined; 514
- perceptual motor training, preschool children; 505
- performance in cross-country running; 371
- performance depressant, artificially increased moment of inertia; 110
- performance goals, influence on learning a gross motor task; 162
- personality characteristics of women educators; 127
- personality impressions, student acceptance and rejection patterns; 459
- personality traits, college basketball officials; 484
- personality traits, female teacher education students and physical education students; 274
- personality variables in aged men; 134
- physical education classes, interaction analysis; 351
- physical education programs, attitudinal differences; 364
- physical education students, compared with teacher education students; 274
- physical fatigue, depressant on motor learning; 110
- physical fatigue, effects on performing a novel motor task; 243
- physiological requirements; aerobic dancing; 120
- physiological variables in aged men; 134
- Piaget's, "Rules of the Game"; 414
- pincushion distortion, in underwater diving; 428
- practice, distributed and massed; 23
- preschool children, perceptual motor training; 505
- Presidency and body image, Lincoln, Abraham; 489
- pretask speed training; 1
- progressive learning curve; 23
- puberty, effects on reaction and movement times; 335
- pursuit rotor skills for girls, 85

**Q****R**

- ratings of physical performance, influenced by judges' expectations; 463

- reaction time, influenced by puberty; 335
- reading skills, factorial analyses of; 85
- risk taking, influenced by sex and achievement motivation; 58
- rotor pursuit apparatus, hand-eye coordination task; 71
- rotary pursuit skill acquisition; 1
- run-walk, 600-yd test; 230
- running, cross-country; 371
  - distance tests; 169
- running speed, football players, effects of jab and cross-over steps; 147

**S**

- sartorius and tensor fascia latae muscles, studied via fine-wire electrodes; 358
- Scheffé test; 23
- self-confidence (O), (Cattell 16 PF), related to ability to withstand stress; 71
- Self-Contained Underwater Breathing Apparatus (SCUBA); 100
- serial motor responses, e.g., typing, running, throwing; 514
- serial perceptual motor responses; 514
- sex, effects on risk taking; 58
- sex effects of subject and audience, motor performance; 379
- sex and orientation toward winning in sport; 476
- sexual revolution, adolescent problems; 184
- shoes, LEGG shoe, conditioning device; 422
- significance tests for ANOVA design; 423
- simulation speed, skiing, influence on rate of errors; 92
- ski simulator; 92
- skiers level of proficiency,
  - nonskier, beginner, intermediate, and advanced; 92
- skill acquisition; 1
- skin-fold thickness measurements; 218
- socializing influence of sport; 287
- Sorrenson, Jacki, originator of aerobic dancing; 120
- specificity of training concept, supported by perceptual motor training; 505
- Spielberger State Anxiety Inventory; 162
- Spielberger's Trait Anxiety Inventory; 162
- sport, a socializing factor; 287
- static strength of limbs, relationship to sexual maturation; 335
- static strength, related to muscle endurance; 393
- steady-state work; 38

Stoelting hand grip dynamometer, measuring maximal grip strength; 262  
stress, influence on motor task performance; 71  
stressor, effects on specific motor task; 71  
stroboscopic photography, research instrument; 256  
student acceptance and rejection patterns in the classroom; 459  
surface electrodes practical for kinesiological study; 140  
swimmers, female champions; 441

### T

Test Anxiety Questionnaire (TAQ); 58  
tonic neck posture; 17  
tonic neck reflex (TNR); 17  
total body density; 218  
total body potassium; 218  
training shoe, conditioning device; 422  
transfer scores, rotary pursuit; 1  
tridimensional filming, human movement analysis; 157

### U

underwater diving, influence of visual distortion; 428

### V

vertical jump performance of women; 78  
vertical peripheral vision, in male and female athletes; 200

visual acuity, emmetropic and myopic; 100  
visual distortion, influence on underwater diving; 428  
visual flight feedback; 235  
VO<sub>2</sub> max; 31, 230  
in young healthy females; 498  
volleyball, influenced by isokinetic training; 78

### W

walking-jogging program; 134  
weight, predictor of maximal oxygen uptake; 12  
women athletes, psychological well-being and body image; 191  
women educators, personality characteristics; 127  
women basketball players; 191  
women gymnasts; 191  
women, vertical jump performance related to isokinetic exercise; 78  
work efficiency; 38

### X

xenon-vapor electrical flash lamp, used in stroboscopic photography; 256

### Y

Yerkes-Dodson law; 250

### Z
